

Adarsh Kushwaha

Frontend Developer | React.js | Next.js | TypeScript

Pune, Maharashtra | 9098923194 | adarshkushwaha296@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Engineer with **3+ years** of experience building scalable applications using **React.js**, **Next.js**, and **TypeScript**. Experienced in **microfrontend architecture**, schema-driven systems, performance optimization, and delivering enterprise-grade frontend platforms at scale.

SKILLS

- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Context API, Zustand
- **Performance & Standards:** SSR & SSG, Core Web Vitals, Lighthouse, WCAG 2.2, Bundle optimization, Data Caching
- **Tools & DevOps:** Git, Vite, Webpack, Node.js, REST APIs, GraphQL, Postman, CI/CD Pipelines, Azure, Claude Code

EXPERIENCE

Bajaj Finserv Health Limited

Pune, MH

SDE II – Frontend

Nov 2024 – Present

- **Campaign Management System (B2B SaaS):** Built a **Next.js** portal with a node-based workflow builder using **Zustand**, supporting **15+ live campaigns** and **1.25L+ calls/month** for clients including **HDFC**, **BALIC**, and **TVS**. Improved performance through caching, optimistic updates, and **virtualized tables** handling **100K+ records**.
- **Real-Time Analytics Dashboard:** Built operational analytics dashboards using **GraphQL** and **React Query**, delivering **real-time insights**, call performance monitoring, cost tracking, and business KPIs. Reduced **API requests by 25%** through optimized GraphQL queries and data-fetching strategies, improving decision-making efficiency.
- **Claim Submission Portal (Next.js, SSR):** Built a vendor-agnostic claim submission platform by developing a custom schema-driven form framework using **React Hook Form**, **TypeScript**, enabling **200+ dynamic form variants across 10+ vendors** and processing **20K+ daily claim submissions** with conditional workflows and optimistic UI.
- **Performance Optimization:** Reduced JavaScript bundle size by **76%** (**2.5 MB** → **600 KB**) and improved **LCP from 5.3s** → **1.2s** through code splitting, SSR, image optimization, and render-path optimizations. Increased Lighthouse score from **60** → **95** and crash-free rate from **96%** → **99.3%**.
- **Collaboration & Mentorship:** Partnered with UI/UX and PM teams to deliver scalable frontend solutions. **Mentored junior developers on code quality, Git workflows**, and testing best practices, reducing team-wide bug density by **40%**.

SDE I – Frontend

Jan 2023 – Oct 2024

- **Lab Booking Portal:** Built a scalable React-based B2B lab booking platform using **Module Federation** microfrontend architecture, supporting **10K+ monthly bookings**. Used **React Query** for server-state management with optimistic UI updates and caching, alongside localization-driven component rendering, delivering a **75% faster booking experience**.
- **Frontend Security:** Strengthened web portal security by implementing **CSP**, **input sanitization**, **secure cookie practices**, and **authentication safeguards**, maintaining **0 critical security findings** in production releases.
- **Codebase Takeover & CI/CD:** Led vendor frontend portal takeover, conducted codebase analysis, knowledge transfer, and established CI/CD pipelines enabling independent delivery within **two weeks**.

PROJECTS

- **Call Pulse Portal (React.js, Express) :** Built an AI-powered call analytics platform processing **5K-8K recordings daily**. Designed an end-to-end pipeline to split long audio files into contextual chunks and generate **transcriptions, sentiment analysis and insights**. Delivering **97% accuracy** while optimizing inference costs.

ACHIEVEMENTS

- **HackerX 3.0 Hackathon:** Secured **Top 10** position among 500+ competing teams.
- **2 × Sharp Shark Award:** Recognized for architecting a scalable Lab Booking and Claim Processing portal

EDUCATION

University Institute of Technology, RGPV

B.Tech in Information Technology

Bhopal, India

June 2019 – May 2023
